

Errata for
A First Course in Atmospheric Thermodynamics
1st Edition, 2nd printing

April 26, 2012

This page documents significant errors in the textbook that were discovered after the book went to press. These errors will be corrected in the next printing. If you find errors not listed here, please send a message describing the error to info@sundogpublishing.com.

pp. 246–247: There are several inconsistencies in the derivation with respect to the use of primed and unprimed quantities. To be consistent with the end result (8.9), all variables referring to the environment should be unprimed and all variables referring to the parcel should be primed, contrary to the way the notation is introduced on p. 246.
